Set Parameters by opening a Parameter Window

Note: Slab profile models defined in initialization cells at the bottom of this notebook.

Plot Real and Imaginary parts of n_z from 4nd order
cold plasma dispersion relation (Fast and Slow roots)
N.B. Here n_z is perpendicular to B. But in nzColdDisFS n_z is parallel to B. So think of it as exchanging $n_z \longleftrightarrow n_x$.

α = 1.5, nx = 0.25
